

# PP Woven Needle-punch Fabric

Premium, landscape quality, black (125gsm-165gsm) (4 oz to 5 oz) woven needle-punched fabric is 30 mils thick and manufactured from UV-resistant polypropylene tapes and needled with PP fibers to give a carpet like effect. They are made from 100% woven polypropylene then needle punched to aid in permeability and capillary action

Also known as Cap Fabric or Weed barrier fabric which is woven fabrics that let air and water to the roots. Weed barrier fabrics are environmentally friendly, long-lasting and effective.

Basically weeds grow either from seeds, or they reproduce from their roots. As the roots grow outward from the parent plant, new plants sprout up from the lateral roots, creating more parent plants and the process continues and the weeds thrive.

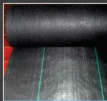

Weeds that tend to reproduce from the root are usually more difficult to control. The best way to rid your garden of weeds is to stop them from growing.

Weed barrier is used to prevent those weeds from coming back. Weed barrier fabrics allow the soil to breathe. After spending hours pulling out garden weeds, you can choose a weed barrier to prevent those weeds from coming back.

We supply high quality fabrics designed for professional and commercial use that is approved by leading landscape architects and most government agencies. Weed barriers supplied by us, are permeable, conserve soil moisture, increase growth and prevent unwanted weeds from germinating. Colored stripes located 12 inches apart make for easy plant alignment

## Features:

- Blocks weeds
- Helps prevent erosion
- Long - lasting polypropylene
- High UV resistance
- Fuzzy side holds rocks, bark or straw in place
- Water and air permeable
- Mildew resistant

## Rolls Sizes: Sizes (Ft)

- |         |         |          |
|---------|---------|----------|
| 3 x 250 | 4 x 250 | 5 x 250  |
| 8 x 200 | 9 x 250 | 12 x 250 |
